

“**Irrigation Management**” is one of the “Mae Fah Luang Development Manual” series, which gathered knowledge and development approaches the Mae Fah Luang Foundation has gained from more than 25 years of hands-on experience in poverty alleviation in many areas, and written as manuals to guide the implementation process in the targeted area in hope to disseminate what we have learned and pass on the innovation of becoming self-reliance to communities regardless of their race, nationality or religion

As enhancing the community's ability to manage is important, the content of "Irrigation Management" covers the whole water system of small river basin, ranging from water system survey, in order to analyze water capital in the area, to pipe, canal and other transmitting system installation, in order for the villagers to maximize benefit from the water source to its full capacity. All steps are designed to be simple, practical, logical and in a participatory manner.

The book is 250 baht (exclude delivery cost). **For more information, please contact the Knowledge and Learning Centre, the Mae Fah Luang Foundation under Royal Patronage at +662 252 7114 ext. 320**
